

TOUCHSCREEN RANGE CONTROL SYSTEM (TRCS)

Meggitt Training Systems is the first company to provide touchscreen range control systems to meet the needs of defense forces around the world. The Touchscreen Range Control System (TRCS) is designed around Meggitt's RangeMaster™ 9000 range control software to meet the increasing requirements for entry level operators to conduct live-fire range exercises. Easy to activate with simple instructions, a user can push a button and the system is operational. The TRCS is especially beneficial on small arms qualification ranges with fixed small arms standards.

The TRCS comes with pre-loaded scenarios, specific to the qualification range type. Simplified screen displays provide only the most important controls, greatly reducing the chance for operator error and the need for trained personnel to conduct live-fire qualification. Critical functions such as loading and running scenarios, pausing, and emergency stops are a few of the controls available to the operator. The TRCS provides additional security to important range exercises. Full windows functionality is only available thru the password protected Administrator account and requires a keyboard and mouse. Additional features include:

- Resistive or Capacitive Touch available
- Wide-format Design with Integrated Speakers
- 3 Year Limited Warranty

TRCS Product Specifications

Specification	Value
Size / Type	22" Diagonal Active Matrix LCD Display
Touch Technology	Resistive or Capacitive
Brightness	250 cd/m
Contents of Packaging	User's manual, power, cord, video cable(s), setup sheet and driver CD
Contrast Ratio	1000:1
Dimensions	Net (with stand): 19.9 in (W) x 15.4 in (H) x 8.7 in (D) 505.2 mm (W) x 390.0 mm (H) x 221.8 mm (D)
