

## XWT GEN3 UPGRADE KIT

Meggitt Training Systems introduced the world's first wireless, 360° turning target system in 2011, and the advancements have continued ever since. Existing XWT GEN3 wireless target systems can be easily upgraded for longer use and shorter charging time. The XWT GEN3 Upgrade Kit is engineered to be backwards compatible and designed to allow for future software and hardware updates.

The XWT GEN3 Upgrade Kit provides flexibility for your range needs, including:

- Lithium ion battery with positive locking connection
- A 50% increase in battery capacity
- Modular design for easy component placement/replacement
- 20V replacement batteries can be easily obtained locally
- 90 day battery warranty
- 1 year warranty on new electronic components if installed by Meggitt

With the XWT GEN3 Upgrade Kit, you'll have more time to operate, use and train on your wireless target retriever – and spend less time charging it. The quiet, smooth, low maintenance wireless carrier is easily operated and programmable, essential for successful training and usability.
