

XWT GEN4 WIRELESS TARGET CARRIER

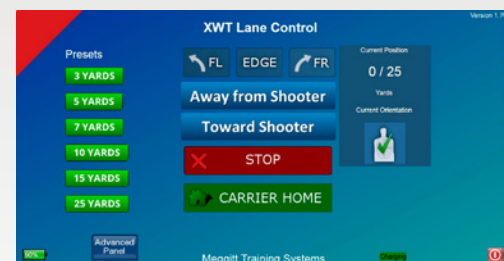

Meggitt Training Systems offers the Next Generation Wireless Target System (XWT) GEN4 to meet the need for efficient, reliable and user-friendly training systems.

The XWT was the industry's first wireless, 360° turning target retrieval system, and advancements to the carrier continue. The XWT GEN4 uses a Lithium Ion battery with a positive locking battery connection and ergonomic battery placement/replacement, providing a 50% increase in battery capacity. The new charging/docking system improves contact design for faster and more reliable charging. That means more time using the XWT GEN4 on your range, and less time charging it.

Programmable distraction lighting now integrates red, blue and white LED target lighting with four times the brightness of previous models. The chassis features a new side cover design for wheel overhead protection and the prevention of brass drivetrain damage. The anti-static wheels eliminate the need for grounding hardware and reduces ESD challenges.

Meggitt's XWT GEN4 provides a host of advantages over other carriers on the market:

- Easily programmable through a wireless controller, allowing uncomplicated intuitive screen operation
- Targets are locally controlled using the Lane Controller (LC) or from a control room area using the Primary Master Control Computer
- Programmable maneuvers and scenarios for skill set development and effective training
- Speed control options provide "Advance / Retreat" training exercises
- Basic and advanced user interfaces support the operator's preferred courses of fire, whether basic qualifications or more advanced reactive and decision making shooting exercises
- Moves along a rail system, powered by an internal direct drive, dual motor system, with anti-static wheels for quieter, smoother operation
- Unique closed track design provides smooth target transportation
- Does not collect lead fragments, casings and other debris
- No drive cables or pulleys to break or replace
- No bulky and noisy drive motors above the shooters head
- No track mounted power feed rails or wires to be impacted and damaged
- Less susceptible to debris in tracks, and reduced need to clean or interfere with target operation
- Includes 3/8" AR500 Front Armor Plate Prow

Programmable wireless lane controller

The XWT GEN4 is the next level of innovative range products available from Meggitt Training Systems. The quiet, smooth, low maintenance wireless carrier is easily operated and programmable, essential for successful training and usability.
